

FERDINANDO D'ALESSANDRO

POSTGRADUATE IN COMPUTER SCIENCE

PERSONAL INFORMATIONS

Gender: Male
Nationality: Italian
Birth date: 03/05/2002
Telephone numbers: 0039-081-5605099
0039-320-9412532
Email account: f.dalessandro.02@gmail.com

Postal address: Via Francesco Cilea 128,
80127, Naples, Italy

SKILLS

Experience **working in a team**
Adaptability to **new languages, tools and platforms**
Experience with **C, C++, Java, Python,**
SQL/PLSQL, Unreal Engine, OpenGL

LANGUAGES

Italian: native speaker
English: fluent
French: basic

PRIZES AND HONOURS

Finished on the **podium** of the **Latin translation competition** "Certamen Lucretianum" in the years **2016, 2018 and 2019**.

Was awarded in **2019** the free participation in the **"Summer School" program** offered by the **Bournville College** (Birmingham, England), consisting of three weeks of **intensive English language course** at the college and a **FCE Cambridge exam**.

HOBBIES

Black belt in Shotokan **Karate**
Passionate about **music, musician**
Enthusiastic about circus arts:
practiced **aerial silks** and **trapeze** for 4 years

EDUCATION

Bachelor of Science in Computer Science

University of Naples Federico II,
Naples, Italy
2020 – 2023

Graduated with **highest honours** (summa cum laude)
Thesis: "*Applications of multi-armed bandits in RL*", supervisor: Prof. Marco Faella
Cumulative GPA of **29.24/30.00**

Academic excellence scholarships:

Federico II: 50% tax discount (2021 and 2023), tax refund (2022)
ENPAM foundation: monetary prize (2022)

High school diploma

Scientific lyceum "Tito Lucrezio Caro",
Naples, Italy
2015 - 2020

Graduated **cum laude**
Honours: Top-merit based monetary prize (2020)

PUBLICATIONS

Silvio Barra, Ferdinando D'Alessandro, Oleksandr Sosovskyy
Exploring Architectural Choices and Emerging Challenges in Data Management for IoT: A Focus on Digital Innovation and Smart Cities June 2024

WORK EXPERIENCE

Traineeship at the department of engineering DIETI at University of Naples Federico II:

Jun. 2023 - Nov. 2023

Research assistant in using variance based algorithms like VBR (<http://wpage.unina.it/m.faella/Download/ecai20-vbr.pdf>) in Reinforcement Learning.

PROJECTS

The majority of the projects I've worked on have been developed in a team of two or three people.

- **Client-server management software for restaurants**, composed of an **Android mobile application** developed using **Java** and a **cloud EC2 containerized server** developed using **Java**, a **MySQL database** and **Spring Boot** communicating with **HTTP**:
<https://github.com/FerdiDale/Ratatouille23-INGSW>
- **Client-server software** created to simulate a **robot capable of taking drink orders and communicating**, composed of an **Android mobile application** developed using **Java** and a **multithreaded server** developed using **C** communicating with **TCP sockets**:
<https://github.com/FerdiDale/Project-LSO>
- **C++ framework of data structures**: vectors, lists, stacks, queues, binary trees, BST, hash tables:
<https://github.com/FerdiDale/AlgorithmsAndDataStructuresLibrary>
- Implementation using **C**, **OpenMP** and **OpenMPI** of **parallel matrix operations**:
<https://github.com/FerdiDale/PDC>
- Collection of Computer Graphics exercises, using **C**, **gl**, **glu** and **glut**:
<https://github.com/FerdiDale/OpenGL>
- **Mobile game** fully solo developed in **Android**, based on procedural generation and motion controls, to be published on the Google Play Store:
<https://github.com/FerdiDale/BoMaze.git>
- A feedforward neural network implemented in **Python from scratch**, trained on the MNIST dataset
<https://github.com/FerdiDale/Libreria-NNDL.git>
- **PC adventure game** developed using **Unreal Engine 5** in the span of 6 months:
<https://github.com/FerdiDale/AtHerExpense.git>
